

SUCCESS STORIES OF STARTUPS

Under RKVY RAFTAAR Scheme

Bioprime Agrisolutions Pvt. Ltd.

Founder: Dr. Renuka Karandikar

Focus Area: Agricultural Inputs & Biotechnology

Website: <http://www.bioprimeagri.com/>

Email: renuka@bioprimeagri.com

Mobile: +91 – 9850037832

Foundation Year: 2016

Location: Maharashtra

Limited availability of biological inputs for crop growth and protection.

Bioprime developed a next generation agribiologicals that help crops become climate resilient using two proprietary discovery platforms SNIPR (Smart Nano molecules Induced Response Modulation) and Bionexus, thus protecting the crops from fluctuating weather, untimely rains, temperature stress, water stress, etc.

The agri solution has a targeted pathway modulation with high compatibility with all current chemicals. It is with 100% batch to batch consistency and stability.

Enhanced crop production leads to a more diverse and nutritious diet, potentially addressing malnutrition and improving public health. When farmers experience better crop yields and reduced vulnerability to climate-related issues, it can help curb rural-to-urban migration. Higher crop yields, cost reduction and better-quality produce, resulting in increased revenues for farmers and the agricultural sector. Reduced use of synthetic pesticides and fertilizers, thus lowering the environmental impact.
