Master Mind Agro Industries

Founder Name: Gursewak Singh

Focus Area: Agricultural Mechanization

Email: mastermnd2015@gmail.com

Contact No.: 9876482957

Incorporation State: Punjab

Incorporation Year: 2020

The innovation addresses the need for efficient and cost-effective agricultural machinery. The self-propelled spray machines developed by Gursewak Singh are fuel-efficient, low-cost, and adjustable in height, making them suitable for various crops. These machines also feature a fertilizer spreader covering 55 feet, surpassing the 40 feet coverage of other market options. This innovation not only enhances spraying efficiency but also repurposes scrap tractors, extending their life by around 10 years.

The self-propelled spray machines are designed for versatility and cost-effectiveness. They cater to specific needs such as orchards and tea gardens. The machines are incubated at PABI, PAU, Ludhiana, and priced at 10 lakh per unit, making them the lowest in the market. They are suitable for all crops and offer a significant increase in operational efficiency.
