Year of Startup Incorporation: 2020

Farm Sathi

Weed and pest control involve intense labour of daily wage workers as well as the use of hazardous chemicals which are harmful to both health and the environment. Due to shortage of labour and spraying of harmful chemicals are the core issues.

Farm Sathi – an autonomous and fully electric robot to assist farmers with weed control and spraying applications. Farmers can subscribe to our weed management and spraying services on an annual or seasonal basis for half the price of traditional methods. Traditional methods require heavy labour of daily workers and other equipment with skilled operators, diesel, and maintenance.

Effectively reduce agricultural weed and pest management expenses by 50% with minimal labor and zero herbicide usage. Comes it annual Subscription Basis with no Technology Adoption Barrier for farmers. Our fully electric robots come with both manual and auto navigation modes for minimal human intervention and zero opex. Approx Cost of machine ~ 3.5-5 Lakhs INR – being the most competitive in market
